Dear Mr. Shepker:

On August 20 and 22, 1990, the Ohio Environmental Protection Agency (OEPA) representing the United States Environmental Protection Agency (U.S. EPA) conducted an inspection under the Resource Conservation and Recovery Act (RCRA) at the referenced facility. The purpose of the inspection was to determine the compliance status of your facility with respect to the applicable hazardous waste management requirements of RCRA, including the land disposal restrictions.

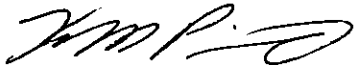

With respect to the land disposal restrictions section of the inspection, the following violation was identified:

Failure to retain on-site copies of all notices, certifications, demonstrations, and other documentation for at least five (5) years from the date that the waste was last sent to an on-site or off-site treatment, storage, or disposal facility, as required by 40 CFR 268.7(a)(6).

Please submit to this office within thirty (30) days of receipt of this Notice of Violation, documentation demonstrating that this violation has been corrected and indicating what measures have been initiated to assure future compliance. Failure to correct these violations may subject your facility to further Federal enforcement action.

Enclosed is the inspection report for your records. If you have any questions concerning this correspondence, please contact Catherine McCord at (312) 886-4436.

Sincerely yours,

LAND DISPOSAL RESTRICTION NOTIFICATION AND CERTIFICATION FORM
FIRST-THIRD SCHEDULED WASTES FOR WHICH TREATMENT STANDARDS HAVE BEEN SET
("HAZARD-HANDLER" WASTES RESTRICTED AS OF AUGUST 8, 1988)

Generator Name: WARREN CONSOL
EPA ID Number: 04000040452 Manifest Number: 01203

This form is submitted to By-Product in accordance with 40 CFR Part 268, which restricts the land disposal of certain hazardous wastes. I have marked the appropriate space below to indicate how my waste must be managed to conform to the land disposal restrictions. (See reverse side for instructions on using this form.)

☒ A. Restricted Waste Requires Treatment

I am the initial generator of one (or more) of the following hazardous wastes which I have circled. This waste must be treated to the applicable treatment standard(s) set forth at 40 CFR Part 268, Subpart D prior to land disposal: K006, K001, K004, K008, K015, K016, K018, K019, K020, K021, K022, K024, K025, K030, K036, K037, K044, K045, K046, K047, K049, K061, K062, K069, K083, K086, K087, K099, K100, K101, K102, K103, K104. (See reverse side for waste code descriptions and allowable treatment methods.)

☐ B. Restricted Waste Treated to Performance Standard

The waste identified above has been treated in compliance with one or more of the applicable performance standard(s) specified in 40 CFR Part 268 Subpart D. Supporting data is available to be provided as requested by the receiving facility.

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

☐ C. Restricted Waste Subject to Variance

☒ A. Restricted Waste Requires Treatment

I am the initial generator of one (or more) of the following hazardous wastes which I have circled. This waste must be treated to the applicable treatment standard(s) set forth at 40 CFR Part 268, Subpart D prior to land disposal: P006, K001, K004, K008, K015, K016, K018, K019, K020, K021, K022, K024, K025, K030, K036, K037, K044, K045, K046, K047, K060, K061, K062, K069, K083, K086, K087, K099, K100, K101, K102, K103, K104. (See reverse side for waste code descriptions and allowable treatment methods.)

☐ B. Restricted Waste Treated to Performance Standard

The waste identified above has been treated in compliance with one or more of the applicable performance standard(s) specified in 40 CFR Part 268 Subpart D. Supporting data is available to be provided as requested by the receiving facility.

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

☐ C. Restricted Waste Subject to Variance

The waste identified above is:

- ☐ (1) One of the following wastes and subject to the land ban prohibitions on August 8, 1990: K048, K049, K050, K051, K052, and K071.
- ☐ (2) Contaminated soil for which the treatment standard is based on incineration and subject to the land disposal prohibition on August 8, 1990. (Soils contaminated with K001, K083, K087, K101, K102, K015, K016, K018, K019, K020, K024, K030, K037).
- ☐ (3) Subject to a case-by-case extension or no-migration petition which expires on _____
- ☐ (4) For wastes destined for deep well injection, the following wastes are subject to the land ban prohibitions on August 8, 1990: K049, K050, K051, K052, K062, K071, and K104.

B. Restricted Waste Treated to Performance Standard

The waste identified above has been treated in compliance with one or more of the applicable performance standard(s) specified in 40 CFR Part 268 Subpart D. Supporting data is available to be provided as requested by the receiving facility.

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

C. Restricted Waste Subject to Variance

The waste identified above is:

- (1) One of the following wastes and subject to the land ban prohibitions on August 8, 1990: K048, K049, K050, K051, K052, and K071.

("HAZARD-REDUCED" WASTES RESTRICTED AS OF AUGUST 8, 1988)

Generator Name: W.C.I.I.
EPA ID Number: K002 Manifest Number: 01077

This form is submitted to BPMs in accordance with 40 CFR Part 268, which restricts the land disposal of certain hazardous wastes. I have marked the appropriate space below to indicate how my waste must be managed to conform to the land disposal restrictions. (See reverse side for instructions on using this form.)

A. Restricted Waste Requires Treatment

I am the initial generator of one (or more) of the following hazardous wastes which I have circled. This waste must be treated to the applicable treatment standard(s) set forth at 40 CFR Part 268, Subpart D prior to land disposal: K006, K001, K004, K008, K015, K016, K018, K019, K020, K021, K022, K024, K025, K030, K036, K037, K044, K045, K046, K047, K060, K061, K062, K069, K083, K086, K087, K099, K100, K101, K102, K103, K104. (See reverse side for waste code descriptions and allowable treatment methods.)

B. Restricted Waste Treated to Performance Standard

The waste identified above has been treated in compliance with one or more of the applicable performance standard(s) specified in 40 CFR Part 268 Subpart D. Supporting data is available to be provided as requested by the receiving facility.

"I certify under penalty of law that I have personally examined and am familiar with the treatment technology and operation of the treatment process used to support this certification and that, based upon my inquiry of those individuals immediately responsible for obtaining this information, I believe that the treatment process has been operated and maintained properly so as to comply with the performance levels specified in 40 CFR Part 268 Subpart D and all applicable prohibitions set forth in 40 CFR 268.32 or RCRA Section 3004(d) without dilution of the prohibited waste. I am aware that there are significant penalties for submitting a false certification, including the possibility of a fine and imprisonment."

C. Restricted Waste Subject to Variance

The waste identified above is:

- (1) One of the following wastes and subject to the land ban prohibitions on August 8, 1990: K048, K049, K050, K051, K052, and K071.
- (2) Contaminated soil for which the treatment standard is based on incineration and subject to the land disposal prohibition on August 8, 1990. (Soils contaminated with K001, K083, K087, K101, K102, K015, K016, K018, K019, K020, K024, K030, K037).

Comments

If the F003 wastestream has been mixed with a solid waste, does the resultant mixture exhibit the ignitability characteristic?

Yes No N/A

4. Does the facility generate any of the following F004 constituents (i.e., spent nonhalogenated solvents) as a result of being used in the process either in pure form or commercial grade?

cresols and cresylic acid
 nitrobenzene

5. Does the facility generate any of the following F005 constituents (i.e., spent nonhalogenated solvents) as a result of being used in the process either in pure form or commercial grade?

toluene
 methyl ethyl ketone
 carbon disulfide
 isobutanol
 pyridine
 benzene
 2-ethoxyethanol

6. Are any of the constituents listed in the questions 1-5 used for their "solvent" properties -- that is to solubilize (dissolve) or mobilize other constituents? The following questions will be helpful in confirming this determination.

(a) Chemical carriers?

Yes No

If the answer is yes, list the constituents.

(b) Degreasing/cleaning?

Yes No

If the answer is yes, list the constituents.

(c) Diluents? Yes ☒ No Comments

If the answer is yes, list the constituents.

(d) Extractants? Yes ☒ No

If the answer is yes, list the constituents.

(e) Fabric scouring? Yes ☒ No

If the answer is yes, list the constituents.

(f) Reaction and synthesis media? Yes ☒ No

If the answer is yes, list the constituents.

If the waste is a mixture of constituents as determined in questions 1-6, answer question 7 to determine whether it is a "solvent mixture" covered by the listings.

7. If the wastestream is mixed and contains more than one of the F001-F005 constituents listed in questions 1-5 (by volume), give the concentration before use of all the constituents in the solvent mixture/blend. For example:

5% methylene chloride
 2% trichloroethylene
 25% 1,1,1-trichloroethane
 68% mineral spirits
 100%

If the wastestream is mixed and contains a total of 10% or more (by volume) of one or more of the F001, F002, F004, or F005 listed constituents before use, it is a listed waste.

With respect to the F003 solvent wastes, if, before use, the wastestream is mixed and contains only F003 constituents, it is a listed waste. For example:

33% acetone
 16% methanol
 51% ethyl ether
 100%

If the wastestream is mixed and contains F003 constituents and a total of 10% or more of one or more of the F001, F002, F004, and F005 listed constituents before use, it is a listed waste.

For example:

50% xylene F003
 12% TCE F001
 38% mineral spirits
 100%

If questions 1-7 led the inspector to believe the waste may be an F-solvent or an F-solvent mixture, answer question 8.

8. Are any of the above constituents spent solvents? A solvent is considered "spent" when it has been used and is no longer fit for use without being regenerated, reclaimed, or otherwise reprocessed.

Yes ☐ No ☒

If yes to any of the questions in 1-8, the constituents in this process are considered solvent in the common sense of the word as used by chemists and chemical engineers. Refer this facility to the enforcement official for follow-up actions verifying the use of solvents at the facility.
